

Anterior Chamber Maintainer

Anterior chamber maintainer is used for maintaining the anterior chamber during an ophthalmic surgical procedure.

Product Description

Product Code	Description	Qty. per box
MIPL/E4	Anterior Chamber Maintainer (20G)	10 Pcs. (Sterile)

Advantages

- The anterior chamber maintainer is connected to a separate saline bottle and the tip is inserted into the anterior chamber through the side port incision.
- In case there is any surge or the chamber becomes shallow, the saline from the bottle automatically fills the anterior chamber avoiding posterior capsule rupture or other surge related complications.
- Ultra thin wall needle for maximum flows
- CE certified

Instructions for Use

The instructions for use and surgical technique are supplied in the form of a leaflet with instructions given in diagram form where appropriate. The international symbols used on the packaging are also explained.

Sterilization

Products are sterilized through Ethylene Oxide (EO) according to a validated cycle.
