

Single Mirror Goniolens

This gonio lens is used for viewing the anterior chamber angle and central retina.

Product Description

Product Code	Description	Mirror Angle
MIPL/I1	Single Mirror Goniolens	62°

Features

- Due to its small size, a single mirror goniolens is very convenient to handle.
- The mirror angle is 62° which when rotated through 360° gives a clear view of the anterior chamber angle.
- Its small contact surface makes it very useful while diagnosing adults as well as children with small palpebral fissure.
- Made in glass.
- Contact medium required.
- CE Certified.

Instructions for Use

The instructions for use and surgical technique are supplied in the form of a leaflet with instructions given in diagram form where appropriate. The international symbols used on the packaging are also explained.

Cleaning & Disinfection

For cleaning and disinfection of the lens, kindly refer to the IFU supplied with the lens or contact our customer care
